

Contents

Module 11 Use-Case Design	11-1
Use-Case Design Overview	11-4
Describe Interaction Among Design Objects.....	11-6
Simplify Sequence Diagrams Using Subsystems	11-24
Describe Persistence Related Behavior	11-30
Refine The Flow Of Events Description	11-34
Unify Classes And Subsystems.....	11-36
Review	11-40
Module 12 Subsystem Design	12-1
Subsystem Design Overview	12-4
Distribute Subsystem Behavior To Subsystem Elements.....	12-9
Document Subsystem Elements.....	12-20
Describe Subsystem Dependencies.....	12-23
Review	12-29
Module 13 Class Design	13-1
Class Design Overview.....	13-4
Create Initial Design Classes.....	13-6
Define Operations	13-12
Define Methods.....	13-21
Define States	13-23
Define Attributes	13-35
Define Dependencies	13-44
Define Associations.....	13-54
Define Generalizations.....	13-73
Resolve Use-Case Collisions.....	13-97
Handle Non-Functional Requirements In General	13-99
Review	13-106
Module 14 Database Design	14-1
Database Design Overview	14-4
Map Persistent Design Classes To The Data Model	14-6
Distribute Class Behavior to the Database	14-18
Review	14-23
